PROGRAM CODING:

APPLICANT:

```
Public class Applicant

{

        Public Integer firstname;

        Public Integer lastname;

        Public void passport()

        {

        }

}
```

PASSPORT APPLICATION SYSTEM:

```
Public class passport application system

{

        Public Integer details;

        Public Integer proof;

        Public class Applicant

        {

        Public Integer firstname;

        Public Integer lastname;

        Public void passport()

        {

        }

        Public void verification()

        {

        }

        Public void issue()

        {

        }

        Public void cancel()

        {
```

```
        }

}

```

OFFICER:

```
Public class officer

{

        Public Integer form;

        Public Integer responsible;

        Public void Database()

        {

        }

}
```
